

NOW ALSO APPROVED FOR CHRONIC MIGRAINE

WHAT IS QULIPTA® (atogepant)?

QULIPTA is a prescription medicine used for the preventive treatment of migraine in adults.

IMPORTANT SAFETY INFORMATION

Do not take QULIPTA if you have had an allergic reaction to atogepant or any ingredients in QULIPTA.

Please see additional Important Safety Information throughout and accompanying Consumer Brief Summary or visit Qulipta.com for full Patient Information.

The truth about migraine

When you're living with migraine, your whole world can feel like a trigger. No matter what you do to avoid your triggers, you still get migraine attacks. Truth is, migraine attacks could be caused by your body's chemistry. QULIPTA® works within your body's chemistry to help prevent migraine attacks.

You can't always prevent what's going on outside—that's why QULIPTA helps what's going on inside.

IMPORTANT SAFETY INFORMATION (cont.)

Before taking QULIPTA, tell your healthcare provider about all your medical conditions, including if you:

- · Have kidney problems or are on dialysis
- Have liver problems
- Are pregnant or plan to become pregnant. It is not known if QULIPTA will harm your unborn baby
- Are breastfeeding or plan to breastfeed. It is not known if QULIPTA passes into your breast milk.
 Talk to your healthcare provider about the best way to feed your baby while taking QULIPTA

Please see additional Important Safety Information throughout and accompanying Consumer Brief Summary or visit Qulipta.com for full Patient Information.

QULIPTA® is a pill:

KEEPS
MIGRAINE
ATTACKS
AWAY
OVER TIME

In 3-month studies, QULIPTA significantly reduced monthly migraine days.

The most common side effects of QULIPTA are: constipation, nausea, and fatigue/sleepiness.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. QULIPTA may affect the way other medicines work, and other medicines may affect how QULIPTA works. Your healthcare provider may need to change the dose of QULIPTA when taken with certain other medicines.

IMPORTANT SAFETY INFORMATION (cont.)

Please see additional Important Safety Information throughout and accompanying Consumer Brief Summary or visit Qulipta.com for full Patient Information.

How QULIPTA® works within your body

Calcitonin gene-related peptide (CGRP) is a protein in your body and is believed to be a cause of migraine attacks. CGRP is believed to play a major role in migraine attacks by causing pain and inflammation.

QULIPTA blocks CGRP.

IMPORTANT SAFETY INFORMATION (cont.)

QULIPTA can cause serious allergic reactions, like anaphylaxis, that can happen when you take QULIPTA or days after. Stop taking QULIPTA and get emergency medical help right away if you get any of the following symptoms, which may be part of a serious allergic reaction: swelling of the face, lips, or tongue; itching; trouble breathing; hives; or rash.

Please see additional Important Safety Information throughout and accompanying Consumer Brief Summary or visit Qulipta.com for full Patient Information.

Talk with your healthcare provider

Be sure to include the following 3 topics in your discussion to determine if QULIPTA° is right for you.

Frequency

Tell your healthcare provider how often you experience migraine attacks.

Ability to Function

Describe daily activities that have been affected due to migraine attacks.

Impact

Discuss how your migraine attacks impact your ability to go about your daily activities.

IMPORTANT SAFETY INFORMATION (cont.)

The most common side effects of QULIPTA are nausea, constipation, and fatigue/sleepiness. These are not all the possible side effects of QULIPTA.

Please see additional Important Safety Information throughout and accompanying Consumer Brief Summary or visit Qulipta.com for full Patient Information.
