Do not take QULIPTA if you have had an allergic reaction to atogepant or any ingredients in QULIPTA.

Please see additional Important Safety Information throughout and click [here](#) or visit [QULIPTA.com](https://www.QULIPTA.com) for full Patient Information.

THE POWER OF

MIGRAINE PREVENTION WITH QULIPTA

Migraine is relentless, debilitating, and can put life on hold.

In 3-month studies, QULIPTA[®] helped significantly reduce monthly migraine days, making more zero-migraine days possible.

**EMBRACE THE POSSIBILITY
OF MORE ZERO-MIGRAINE
DAYS WITH QULIPTA**

IMPORTANT SAFETY INFORMATION (cont.)

Before taking QULIPTA, tell your healthcare provider about all your medical conditions, including if you:

- Have high blood pressure
- Have circulation problems in your fingers and toes
- Have kidney problems or are on dialysis
- Have liver problems
- Are pregnant or plan to become pregnant
- Are breastfeeding or plan to breastfeed

Please see additional Important Safety Information throughout and click [here](#) or visit [QULIPTA.com](#) for full Patient Information.

ONLY PILL OF ITS **KIND**

QULIPTA[®] is the only pill of its kind that blocks CGRP and is approved to prevent migraine of any frequency.

- **GETS RIGHT TO WORK TO PREVENT MIGRAINE ATTACKS**
- **KEEPS MIGRAINE ATTACKS AWAY OVER TIME**

In 3-month studies, QULIPTA[®] helped significantly reduce monthly migraine days.

IMPORTANT SAFETY INFORMATION (cont.)

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. QULIPTA may affect the way other medicines work, and other medicines may affect how QULIPTA works. Your healthcare provider may need to change the dose of QULIPTA when taken with certain other medicines.

Please see additional Important Safety Information throughout and click [here](#) or visit [QULIPTA.com](#) for full Patient Information.

The background of the left page features a large, stylized illustration of a red and yellow QULIPTA tablet. The word "QULIPTA" is printed in white on the red portion, and "RECEPTOR" is printed in white on the yellow portion. Several smaller, red, spherical objects labeled "CGRP" are floating in the background.

HOW **QULIPTA**[®] **WORKS** **DIFFERENTLY**

While some older preventive migraine treatments were initially developed to treat other conditions, QULIPTA[®] was specifically designed to prevent migraine attacks. QULIPTA[®] is a once-daily pill in a different class of preventive treatments — calcitonin gene-related peptide (CGRP) receptor antagonist. CGRP is a protein in your body and is believed to play a major role in migraine attacks causing pain and inflammation. QULIPTA[®] targets CGRP to block it from attaching to your receptors.

QULIPTA BLOCKS CGRP

IMPORTANT SAFETY INFORMATION (cont.)

QULIPTA can cause serious side effects, including:

- **Allergic (hypersensitivity) reactions, including anaphylaxis:** Serious allergic reactions can happen when you take QULIPTA or days after. Stop taking QULIPTA and get emergency medical help right away if you get any of the following symptoms, which may be part of a serious allergic reaction: swelling of the face, lips, or tongue; itching; trouble breathing; hives; or rash.

IMPORTANT SAFETY INFORMATION (cont.)

QULIPTA can cause serious side effects, including (cont.):

- **High blood pressure:** New or worsening of high blood pressure can happen. Contact your healthcare provider if you have an increase in blood pressure.
- **Raynaud's phenomenon:** A type of circulation problem can worsen or happen. Raynaud's phenomenon can lead to your fingers or toes feeling numb, cool, or painful, or changing color from pale, to blue, to red. Contact your healthcare provider if these symptoms occur.
